Education

Symbiosis Institute of Technology, Nagpur — Nagpur, Maharashtra
B.Tech in Computer Science and Engineering — CGPA: 8.81/10.0 — *Expected Graduation: 2028*

Indian Institute of Technology Madras (Online) — Chennai, Tamil Nadu
B.S. in Data Science and Applications (Diploma Level) — CGPA: 7.33/10.0 — *Sept 2024 – Present*

Experience

Data Science & Analytics Intern — May 2026 – June 2026
MainCraft Technologies — *Remote*

- Performed data preprocessing, exploratory data analysis and predictive modeling using Python.
- Built machine learning models using Pandas, NumPy and Scikit-learn for real-world datasets.
- Collaborated on analytics workflows, model evaluation and technical documentation.

Web Development Intern — March 2026 – April 2026
Elevate Labs — *Remote*

- Completed a 45-day task-based internship developing responsive web applications using HTML, CSS and JavaScript.
- Implemented frontend features, debugging techniques and version control using Git.

Projects

MemoryLens | *Python, FastAPI, Ollama, LLaMA, FAISS, SQLite, Sentence Transformers*

- Developed an offline AI-powered personal assistant using Retrieval-Augmented Generation (RAG) to provide privacy-preserving access to local documents and system resources.
- Built a modular FastAPI backend integrating local LLaMA models, FAISS vector database, SQLite and Sentence Transformers for semantic search and context-aware responses.
- Implemented intelligent document retrieval, summarization and natural language interaction across PDFs, codebases and text files without relying on external APIs, ensuring complete data privacy.

CycleCura (Team Lead) | *Python, Scikit-learn, XGBoost, Pandas, NumPy*

- Led a multidisciplinary team in developing an AI-powered menstrual cycle prediction and PCOS/PCOD risk assessment system for personalized women's healthcare.
- Designed and implemented machine learning pipelines for menstrual cycle prediction, feature engineering and health-risk assessment using clinical and lifestyle indicators.
- Directed end-to-end project planning, model development and system integration while coordinating technical deliverables across the team.
- Resulted in a **Patent Application Published** titled *Machine Learning Based Personalized Menstrual Cycle Prediction and PCOS Risk Assessment System* (2026).

Agricultural Crop Price Prediction | *Python, Scikit-learn, XGBoost, Pandas*

- Developed a stacking ensemble machine learning model for agricultural crop price prediction using historical market data and feature engineering techniques.
- Led the complete machine learning pipeline including data preprocessing, model training, hyperparameter tuning and performance evaluation.
- Published the research as **First Author** at **IEEE TEMSMET 2025**; paper published in IEEE Xplore (2026).
- Resulted in a **Patent Application Published** titled *A Stacking Ensemble Machine Learning System and Method for Agricultural Crop Price Prediction* (2026).

Technical Skills

Languages: Python, C, JavaScript, SQL, HTML, CSS
Machine Learning: Scikit-learn, XGBoost, Pandas, NumPy
Developer Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebook
Databases: MySQL, SQLite
Core CS: Data Structures & Algorithms, Object-Oriented Programming

Publications

First Author 2026
IEEE TEMSMET 2025 *Published in IEEE Xplore*

- *"A Stacking Ensemble Machine Learning System and Method for Agricultural Crop Price Prediction"*
